

PHARMACEUTICALS AND BIOMEDICAL COLLECTION

KEY PHARMACEUTICAL AND BIOMEDICAL LITERATURE FROM THE WORLD'S LEADING PUBLISHERS. With intuitive search and collaboration tools, partnered with content from the world's most authoritative publishers, ProQuest Dialog™ enables searchers of all skill levels to quickly find, organize, and share the right information—helping uncover new opportunities, and drive innovation.

GET THE RIGHT ANSWERS, RIGHT AWAY with ProQuest Dialog's precision search experience across industry-leading biomedical literature and specialty content.

STAY COMPLIANT AND CURRENT with alerts that support the diverse needs of pharmaceutical organizations for reliable, timely information to meet the stringent demands of product safety and pharmacovigilance, while providing flexibility for current awareness and literature discovery.

MAXIMIZE EFFICIENCY with customizable single-point access, precision search across multiple databases, and user-friendly functionality for all levels of researchers.

THE PROQUEST DIALOG™ DIFFERENCE

ProQuest Dialog provides all the market leading biomedical and pharmaceutical databases including: **Embase®**, **MEDLINE®**, **Current Contents**, **BIOSIS Previews®**, **Chemical Business Newsbase**, plus **Derwent Drug File**, **IMS R&D Focus**, **Adis R&D Insight**, and **SciSearch®**.

- Access to a variety of industry databases, plus a global news, trade, and full-text patent collection providing a truly comprehensive search
- Search and workflow tools that enable users at all levels to discover, manage, and track research
- Subscription and transactional (Pay As You Go) pricing options to support small business projects and enterprise-wide research

**get more
out of your search
service.**

BENEFITS

- **Confidently monitor adverse events and find precise data** on drug reactions, clinical trials, and pharmacoeconomics
- **Monitor technological developments**, new products, competitor news, industry adoption and broader industry trends
- **Protect R&D investments with timely information** to react to key findings about your drugs or perform research on new therapeutic indications
- **Improve ROI with better insight into competitor's pipelines**, strengths and weaknesses of compounds, potential business risk as well as product and partnership opportunities

KEY FEATURES

- Powerful alerting system with flexible delivery scheduling and format options for easy integration
- Alert management tools to track key information such as next scheduled delivery date and number of records
- Hierarchical thesauri presented in a graphical user interface that is easy to navigate and explore, allowing less experienced searchers to find subjects of interest
- Medical synonyms, allowing end-users to include related terms in their searches and alerts (e.g., "myocardial infarction" included in a search for "heart attack")
- Result filters to help give an authoritative picture of key authors, subjects, and titles within a topical area
- Customized report building tools with formats including PDF, Word, HTML, Excel, user-defined templates and branding, saved searches, and custom preferences to support the diverse needs across the business
- Look-ups for key fields such as author, subject, or therapeutic classifications with "begins with" AND "contains"
- Lateral searching and indexing across key fields such as author, subject, classification, and more enable the ability to pinpoint relevant records
