

Agricultural Science Collection

The **Agricultural Science Collection** provides deep coverage of both basic and applied agricultural research, offering comprehensive full-text access and essential abstracting and indexing across all areas of agriculture and related sciences. This resource supports students, researchers, and professionals by delivering scholarly journals, grey literature, and specialized materials, ensuring accessible and thorough research opportunities.

Key benefits:

- **Premium scholarly journals:** 675 journals from publishers including Springer, Cambridge University Press, and Oxford University Press. Titles include *Proceedings of the Nutrition Society*, *Food Engineering Reviews*, and *Critical Reviews in Environmental Science and Technology*.
- **Essential A&I: AGRICOLA:** The definitive bibliographic database to agricultural science literature.
- **250 Trade Journals and Magazines:** Including *Agricultural Education Magazine*, *New Scientist*, and *AgriMarketing*.

Broad Coverage:

- Agricultural Economics
- Animal and Veterinary Sciences
- Aquaculture and Fisheries
- Entomology
- Environmental Sciences
- Farming Systems
- Food and Human Nutrition
- Forestry
- Plant Sciences

Agricultural Science Collection is part of ProQuest One Sustainability, the world's largest, most varied collection of sustainability content on an interface designed specifically for sustainability study and research.
