

American Psychological Association (APA) Databases

Core databases, available on ProQuest

American Psychological Association (APA) databases allow researchers to access the full breadth of research in behavioral and social science. These resources are offered on the ProQuest platform, pairing their authoritative content with powerful discovery, linking, and retrieval tools that are useful in exposing related content, dynamically linking to full-text documents, and much more.

Each APA database is extremely powerful on its own, but in combination, they create an essential core of behavioral science literature with far-reaching interdisciplinary applications, establishing extraordinary value for any institutional collection.

- **APA PsycInfo®:** Explore the breadth of research in the behavioral and social sciences with confidence. Focused on the interdisciplinary aspects of the worldwide behavioral and social science research and literature, APA PsycInfo is unmatched as a resource for locating scholarly research findings in psychology and related fields across academic disciplines, from the historical to the cutting edge.
- **APA PsycArticles®:** Delve into the science of psychology and behavior with full-text, peer-reviewed articles published by APA and affiliated journals. With current journal coverage and historical content dating back more than a century, this esteemed collection provides access to the full spectrum of research in the field and is an indispensable resource for researchers, practitioners, students, and educators.
- **APA PsycTherapy®:** Available on ProQuest platform, streaming video provides clinicians, counselors, and trainees the opportunity to sharpen their skills by observing candid, unscripted psychotherapy videos featuring renowned therapists. APA PsycTherapy is updated annually and offers access to 600 videos covering over 100 therapy approaches and over 245 topics.
- **APA PsycTests®:** Access psychological tests and measures designed for use with social and behavioral science research. Available on ProQuest platform, expertly-created metadata allows users to find and download instruments for research or teaching. Users can dive into a wide range of test types including test batteries, questionnaires, rating scales, surveys, and much more.
- **APA PsycExtra®:** Devoted to curating and indexing hard-to-find content from authoritative sources, APA PsycExtra allows researchers to go beyond traditional peer-reviewed research materials. Discover the latest conference proceedings, newsletters, reports, patient-oriented factsheets and brochures, magazines, monographs, standards and guidelines, and more.
- **APA PsycBooks®:** An extensive collection of peer-reviewed books provides students, researchers, and educators access to high-quality publications in psychology and related fields, including the newest scholarly and professional books published by APA.
