

Earth, Atmospheric, & Aquatic Science Collection

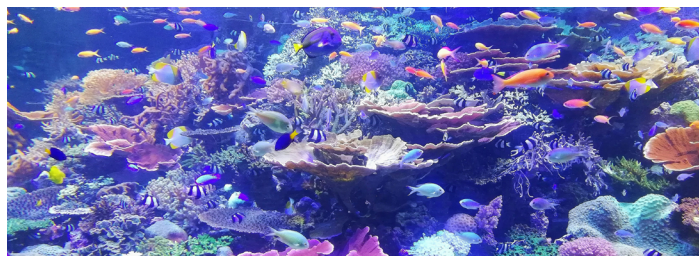

The **Earth, Atmospheric & Aquatic Science Collection** is a hybrid full-text and A&I interdisciplinary resource of scholarly and learned material with a particular focus on geoscience, meteorology, climatology, aquatic science, and related disciplines. Coverage includes thousands of full-text publications including peer-reviewed journals, trade publications, dissertations, conference proceedings, reports, video material, and much more. In addition, the thoroughly indexed Aquatic Science & Fisheries Abstracts (ASFA) and Meteorological & Geostrophysical Abstracts (MGA) ensures users can easily access domain specific knowledge and stay on top of the latest research.

Key benefits:

- **Premium scholarly journals:** 850 scholarly journals including highly cited titles from prestigious publishers like the American Meteorological Society, Springer Science & Business, Nature Publishing, and Cambridge University Press.
- **Essential A&I: AGRICOLA:** Includes specialized A&I databases like Aquatic Science & Fisheries Abstracts (ASFA) and Meteorological & Geostrophysical Abstracts (MGA) to streamline discovery and ensure efficient access to relevant research.
- **250 Trade Journals and Magazines:** Includes trade publications, conference proceedings, books, reports, dissertations, and video materials.

Broad Coverage:

- Aquatic science
- Aquaculture
- Atmospheric science
- Climatology
- Earth science
- Marine biology
- Marine science
- Meteorology
- Geological engineering
- Geoscience

Earth, Atmospheric, & Aquatic Science Collection is part of ProQuest One Sustainability, the world's largest, most varied collection of sustainability content on an interface designed specifically for sustainability study and research.
