

# Environmental Science Collection

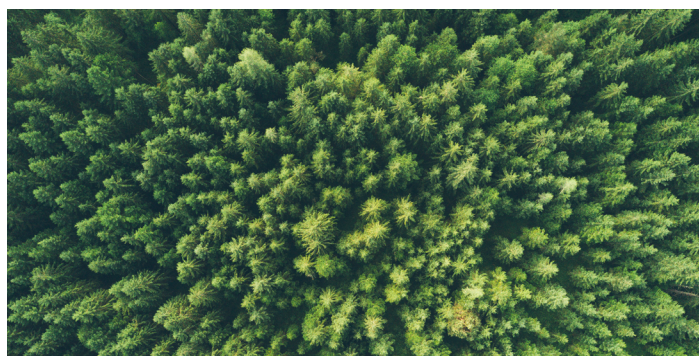

**This comprehensive research resource** for environmental sciences brings together a specialized bibliographic index and an extensive collection of full-text publications, providing both authoritative subject indexing and direct access to a wide range of research outputs. By integrating these elements, the resource supports teaching, learning, and advanced scholarship across environmental sciences, sustainability, and related disciplines.

## Key benefits:

- **Premium scholarly journals:** 1,800 in total featuring high-impact journals from publishers like Nature Publishing Group, Cambridge University Press, and Taylor & Francis
- **Grey Literature:** Needed by researchers to uncover the latest in academic research including reports, working papers, conference papers and proceedings, dissertations, trade publications, and other hard-to-find content.
- **Rich, multiformat content:** Including trade publications, magazines, newspapers, technical reports, and government documents.

## Broad Coverage:

- Climate Change
- Ecology
- Energy
- Environmental Engineering
- Forestry
- Natural Resource Management
- Pollution and Waste Management
- Sustainability Studies
- Water resources

**Environmental Science Collection is part of ProQuest One Sustainability, the world's largest, most varied collection of sustainability content on an interface designed specifically for sustainability study and research.**
