## SAMPLE DOCUMENT

### TI **Pakistan and Romania sign defence trade co-operation agreement**

Grevatt, Jon. **Jane's Defence Weekly** 50. 11 (Feb 13, 2013).

---

#### AB **Abstract (summary)** [Translate](#)

The agreement covers military training, the export and import of defence equipment, industrial collaboration and military exchange visits, building on previous defence accords signed by the countries in 2001 and 2011.

---

#### TX **Full Text** [Translate](#)

Pakistan and Romania signed a co-operation agreement in Islamabad on 14 February to enhance defence trade between the two countries, the Pakistan government said in a statement.

The agreement covers military training, the export and import of defence equipment, industrial collaboration and military exchange visits, building on previous defence accords signed by the countries in 2001 and 2011.

No details of the newly signed agreement were disclosed by the government, although it is probably related to previous efforts by Pakistan and Romania to engender collaboration in the production of grenades and ammunition for tanks and artillery systems. Previous trade between the two countries has also included the Pakistan Army's purchase in the 1980s of Romanian-built SA-330 Puma medium transport helicopters.

The accord is viewed by Islamabad as part of wider efforts to increase collaboration and trade with Romania across strategic sectors. This effort supported the establishment in 2012 of a joint trade commission and will facilitate the start of direct flights between the two countries from April 2013.

## SEARCH FIELDS

You can use field codes on the Basic Search, Advanced Search, and Command Line Search pages to limit searches to specific fields. The table below lists the field codes for this file.

Field Name	Field Code	Example	Description and Notes
Abstract	AB	ab("military training")	Use adjacency and/or Boolean operators to narrow search results.
Abstract present	ABANY	"defence accords" and abany(yes)	Add: <i>AND ABANY(YES)</i> to a query to limit retrieval to records with abstracts.
All fields	ALL	all("artillery systems")	Searches all fields <i>except</i> the full text. Use proximity and/or Boolean operators to narrow search results.
All fields + text	--	pakistan and romania	Searches all fields including the full text.
Author <sup>1</sup>	AU	au("grevatt, john")	Includes all authors.
CODEN	CODEN	jidrfo	
Company/organization <sup>1</sup>	ORG, CO	org(eurocopter) org("homeland security")	Searches all company/organization information including government departments.
Copyright	CY	cy("ihs global")	
Document text	TX, FT	tx((cooperation or agreement or collaboration) and defence)	Use adjacency and/or Boolean operators to narrow search results.
Document title	TI	ti("defence trade" and pakistan and romania)	Use adjacency and/or Boolean operators to narrow search results.
Title only	TIO	tio(pakistan and romania)	Searches <i>only</i> the Title, not alternate or sub-title.
Document type <sup>1</sup>	DTYPE	dtype("periodical")	Jane's has just two types: News and Periodical.
First available	FAV	fav(20130216) fav(2013-02-16) fav(>20121231) fav(20120101-20120630)	Indicates the first time the document was loaded on PQD. It will not change however many times the document is subsequently reloaded, as long as the accession number remains the same.
From database <sup>2</sup>	FDB	ti("no fly zone") and fdb(janesdefense)  ti("no fly zone") and fdb(1008714)	Useful in multi-file searches to isolate records from a single file. FDB cannot be searched on its own; specify at least one search term then <i>AND</i> it with FDB.
Full text present	FTANY	wikileaks and ftany(yes)	Add: <i>AND FTANY(YES)</i> to a query to limit your search to articles with full text.
Issue	ISS	iss(11)	Also searchable via the Look Up Citation tool.
Journal title	JN	jn("jane's defence weekly")	Journal names only. For searching complete range of publication types, use PUB.  Displays in Publication title.  Also searchable via the Look Up Citation tool for Publication name.
Language	LA	la(english)	
Location <sup>1</sup>	LOC	loc("north korea") loc(virginia)	Also searchable with SU.
People	PER	per(morsi)	Also searchable with SU.
Place of publication	PBLOC	pbloc(horley)	
Publication date	PD	pd(20130213) pd(2013-02-13) pd(>20130213)	Also searchable via the Look Up Citation tool.

<sup>1</sup> A Lookup/Browse feature is available for this field in the Advanced Search dropdown or in Browse Fields.

<sup>2</sup> Click the "Field codes" hyperlink at the top right of the Advanced Search page. Click "Search syntax and field codes", then click on "FDB command" to get a list of database names and codes that can be searched with FDB.

Field Name	Field Code	Example	Description and Notes
		pd(20120701-20120731)	
Publication title <sup>1</sup>	PUB	pub("jane's defence weekly") pub("jane's airport review")	Title of publication where document originally appeared. Also searchable via the Look Up Citation tool.
Publication year	YR, PY	yr(2013) yr(>2011) yr(2011-2013)	Single year or a range of years may be searched.
Publisher	PB	pb("jane's information group")	
Subject	SU	su("lockheed") su("south korea") su(obama) su("electronic warfare")	Terms describing the key subjects covered by the article. SU also searches Company/ organization, Location, Person
Updates	UD	ud(>20121231) ud(20130101-20130630)	The date(s) the record was loaded as a result of an update provided by the supplier.
Volume	VO	vo(29)	Also searchable via the Look Up Citation tool.

In addition to [Search Fields](#), other tools available for searching are [Limit Options](#), [Browse Fields](#), ["Narrow Results By" Limiters](#) and [Look Up Citation](#). Each is listed separately below. Some data can be searched using more than one tool.

## LIMIT OPTIONS

Limit options are quick and easy ways of searching certain common concepts. Check boxes are available for:

### Full text

A short list of choices is available for:

### Document type

**Date limiters** are available in which you can select single dates or ranges for date of **publication** and **updated**.

## BROWSE FIELDS

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down and in the search options for:

### Subject, Company/organization, Location

and in the fields drop-down only for:

### Author, Publication title

## "NARROW RESULTS BY" LIMITERS

When results of a search are presented, the results display is accompanied by a list of "Narrow results by" options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to ("narrow") your search results. Narrow results by limiters in this database include:

**Full text, Source type, Publication title, Document type, Subject, Company/organization, Location, Person, Publication date**

## ***LOOK UP CITATION***

If you need to trace a particular bibliographic reference, use the Look Up Citation feature. Find a link to this toward the top left of the Advanced Search page, or in the drop list under Advanced on any search form; click this and you will go to a page where you can enter any known details of the citation, including: Document title, Author, Publication title, ISSN, ISBN, Volume, Issue, Page, Publication date, DOI.
