

Northern Light Life Sciences Conference Abstracts

Description

Northern Light provides deep and timely coverage of life sciences research presented at conferences. The database contains references to all data made available by the conference sponsor, and can predate by many months – even years - the information that gets published in scholarly journals: *Northern Light* makes the data available for searching within three weeks of being posted on the conference sponsors' sites.

Records can be searched by disease, treatments, drugs, clinical trial phases, medical devices, and therapies. Sponsoring organisations from all fields of biomedicine, clinical medicine, life sciences, nursing, and pharmacology from around the world are included in the database.

Since more than fifty percent of trials reported at conferences never reach full publication, *Northern Light Life Sciences Conference Abstracts* - representing 'grey literature' - is of critical importance to R&D personnel in pharmaceutical and other biomedical corporations, to academics, healthcare policy organizations, hospital laboratories, and anyone with an interest in cutting-edge life science research.

At launch, the database covers some 2.7 million conference abstracts and over 140,000 posters (containing statistical and graphical data) covering some 3,800 life sciences conferences back to 2010.

Northern Light records on ProQuest Dialog contain the document title, conference title, author names, conference start date, sponsor, and indexing terms to identify the subjects and concepts covered, as well as a snippet of the abstract. The full abstract is only accessible by linking back to the conference website (link provided). This ensures that the database is 100% copyright compliant. *Northern Light* cannot guarantee that all websites remain available indefinitely as they are administered independently; they estimate that – on average – some 10% of sites are inactive – though fewer in the current year. Only conferences that are openly available are covered in *Northern Light*; any requiring membership to access the abstracts are not included

Use *Northern Light Life Sciences Conference Abstracts* to:

- Validate that research is novel and innovative while brainstorming an idea designing a study or applying for a grant
- Search for unpublished studies or data to reduce level of possible bias.
- Track details on investigator sponsored trials of your company's drug at conferences.
- Gather comprehensive data about the results of another pharmaceutical company's drug — or for drug discovery, to assist preclinical studies for competitive purposes.

Disruption of Cancer Stemness By Targeting the JNK-STAT3 Pathway In Neuroblastoma

Higashi, Mayumi; Kin, Kiyokazu; Tajiri, Tatsuro. **Symposium on Molecular Targets and Cancer Therapeutics 2017** (Oct 26, 2017)

Highlighting: Off | Single | Multi

AB **Abstract (summary)** Translate [unavailable for this document]

... Results: The IMR5, NLF, SK-N-AS neuroblastoma cell lines showed remarkably lower cell viability after treatment with SP600125 or JNK-IN-8, in comparison to nontreated cells. ... Cell death was more significant in cells with **faster** proliferation than in cells with slower proliferation, which showed differentiation after JNK inhibitor treatment. ... cells with MYCN amplification or 1p deletion, both unfavorable prognostic markers, showed high levels of JNK expression and strong STAT3 s727 phosphorylation, while STAT3 y705 phosphorylation was not found in any cell lines. ... SEARCH FIELDS

Field Name	Field Code	Example	Description and Notes
Abstract	AB	ab("neuroblastoma cell lines ")	
Accession number	DAN, AN	dan(PE2017110600001670)	A unique document identification number assigned by the information provider.
All fields + text	--	"brca1" and "lung neoplasms"	Searches all fields.
Author ¹	AU	au("higashi, m*")	
Author affiliation	AF	af("kyoto prefectural ")	Displays in the <i>Author</i> field
Conference sponsor	CS	cs(aacr)	
Conference start date	CDT, ESDT	cdt(20171026) esdt(20171026)	Only a specific date can be searched – in the format YYYYMMDD. See <i>Publication date</i> for other search options.
Conference title	CFTI	cfti("molecular targets")	The conference title is duplicated in the Publication title field
Document title	-	-	See <i>Title</i> .
Document type	DTYPE	dtype("conference abstract")	Northern Light records are one of two Document types: Conference Abstract or Conference Poster.
First available	FAV	fav(20180201) fav(>20180119)	The date a document was loaded in a specific database on PQD for the first time. It will not change regardless of how many times the record is subsequently reloaded - as long as the accession number does not change. FAV supports range searching.
From database ²	FDB	ti("monoclonal antibodies") AND fdb(northern light) ti("monoclonal antibodies") AND fdb(1009284)	Used in multi-file searches to isolate records from a single file. FDB cannot be searched on its own; specify at least one search term then AND it with FDB.
Language	LA	la(english)	LA searches for language of original publication; all abstracts are in English.
Language of abstract	SL	sl(english)	All abstracts are in English.
Publication date	PD	pd("oct 26 2017") pd(20171026) pd(>20170930)	In this database, publication date refers to the start date of the conference. PD supports range searching.
Publication title	PUB	pub("molecular targets" and 2017)	The conference title is duplicated here. Northern Light records are not sourced from published material but from conference sponsors' websites.
Publication year	PY, YR	yr(2017) yr(2015-2017)	Displayed as part of <i>Publication date</i> . YR supports range searching.

Publication type	PSTYPE	pstype("conference papers & proceedings")	The same for all records.
Subject ¹	SU	su("cancer stem cells")	The <i>Subject</i> field contains different indexing types: Cell, Cell receptor, Clinical trial, Diagnostic/therapeutic, Disease, Gene, Human anatomy, Mechanism of action, Medical device, and Therapeutic area. Not every record will have each type of subject indexing.
Substance	SUBST	subst("tyrosine")	The <i>Substance</i> field contains different indexing types: Drug, Generic drug, Enzyme, and Protein. Not every record will have each type of substance indexing.
Title	TI	Ti("cancer stemness" n/3 disruption)	The <i>Title</i> of the abstract or poster.
Updates	UD	ud(20171213) ud(>20171231)	The date(s) the record was loaded as a result of an update provided by the supplier. UD supports range searching.
URL		- <i>not searchable</i> -	The URL is a hyperlink that opens the abstract in a new tab on Northern Light's own servers. Sometimes additional information, or a link to the original published abstract/poster will be available.

1. A Lookup/Browse feature is available for this field in the Advanced Search dropdown or in Browse Fields.
2. Click the "Field codes" hyperlink at the top right of the Advanced Search page. Click "Search syntax and field codes", then click on "FDB command" to get a list of database names and codes that can be searched with FDB.

SEARCH TOOLS

In addition to *Search Fields*, other tools available for searching are *Limit options*, *Browse Fields*, *“Narrow results by”*, and *Filters*. Each is listed separately below. Some data can be searched using more than one tool.

LIMIT OPTIONS

Short lists of choices are available for:

Document type

Date limiters are available in which you can select single dates or ranges for date of **publication** and **updated**.

BROWSE FIELDS

You can browse the contents of certain fields by using Look up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look up lists are available in the fields drop-down for:

Author, Subject

“NARROW RESULTS BY” FILTERS

When results of a search are presented, the results display is accompanied by a list of “Narrow results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to (“narrow”) your search results. “Narrow results by” filters in Inspec include:

Author, Conference title, Document type, Language, Publication title, Subject, Substance, and Publication date

DOCUMENT FORMATS – SUBSCRIBERS

Document Format	Fields	Online	Export / Download
List of Results - Brief view	Title, Author(s), Publication date.	✓	
List of Results - Detailed view	Title, Author(s), Publication date, 3-line KWIC window.	✓	✓
List of Results - KWIC (Keyword in Context)	Title, Author(s), Publication date, all occurrences of search terms highlighted in the field(s) where they occur.	✓	✓
Preview	Title, Author, Publication date, Abstract, Subject.	✓	
Brief citation	Complete record minus the Abstract and Subject indexing.	✓	✓
Citation/abstract	Complete record including Abstract	✓ ¹	✓
Custom	Choose the fields you want.		✓ ²

¹ In Online-view mode, PQD gives access to two document formats only: Brief citation, and the 'most complete' format available. Depending on the database and/or the amount of data available for a record, the most complete format may be any one of Citation, Citation/abstract, Full text, or Full text – PDF.

² Custom export/download format is available in the following mediums only: HTML, PDF, RefWorks, RTF, Text only, and XLS

DOCUMENT FORMATS – TRANSACTIONAL USERS
